

THERA
TRAINER

CYCLING

THERA-Trainer mobi

The small and portable motor-assisted cycling trainer —
designed for flexible use in clinical settings and at home.

L I F E I N M O T I O N

Become active — from chair or sofa!

We should all engage in some form of physical activity every day. This can help improve health and reduce the risk of heart disease and stroke, as well as risk of falling.

The mobi is a good choice for those with limited walking ability or minor movement restrictions such as those with general age-related weakness or with mild symptoms of other illnesses.

The THERA-Trainer mobi can be converted from leg to upper body exerciser or vice versa in a matter of seconds. It's really simple: An interlock system makes it easy to swap the therapy grips and the foot rests to switch from leg training to upper body training.

High quality certified
medical device

Transition: Clinic to Home

Continue progress.
Build independence.

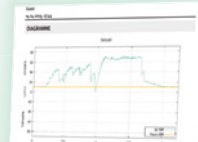

“Limited walking ability often reduces activity in daily life. The compact THERA-Trainer mobi enables regular movement training even in small spaces and helps patients stay active despite mobility limitations — from clinic to home.”

Hans Lamprecht
Physiotherapist, Specialist in Neurological and Geriatric Rehabilitation

Compact and
easy to transport

With THERA-soft
motivational video routes
and goal-oriented gami-
fication on a TV/screen,
incl. documentation

Intuitive user interface and
design allows setup in less
than 1 minute

The shielded design is
a plus for safety and
meets the highest
standards of hygiene
and disinfection

Assistive technology
Motor-operated (passive),
motor-assisted or active movement
training (with own muscle power).

Leg and upper body trainer
Can be easily converted from a leg
exerciser to an upper body exerciser
in seconds.

Professional medical technology
Engineered to medical standards and
designed to exceed the limitations of
low-cost consumer devices.

Your individual solution

THERA-Trainer complete solutions are the consistent implementation of evidence-based, clinically proven rehabilitation pathways, using advanced robotic-assisted technology.

We will help you to find the perfect combination of our THERA-Trainer products for your requirements, whether you work in acute care, rehabilitation, inpatient or outpatient care or any other setting.

- ✓ More therapy time per patient without extra staff
- ✓ Increased therapy intensity as a basis for better outcomes
- ✓ Improved cost efficiency through optimised resource allocation
